279. M. RADON DISCLOSURE: (The following Seller disclosure satisfies MN Statute 144.496.)

280. RADON WARNING STATEMENT: The Minnesota Department of Health strongly recommends that ALL
281. homebuyers have an indoor radon test performed prior to purchase or taking occupancy, and recommends
282. having the radon levels mitigated if elevated radon concentrations are found. Elevated radon concentrations can
283. easily be reduced by a qualified, certified, or licensed, if applicable, radon mitigator.

284. Every buyer of any interest in residential real property is notified that the property may present exposure to
285. dangerous levels of indoor radon gas that may place occupants at risk of developing radon-induced lung cancer.
286. Radon, a Class A human carcinogen, is the leading cause of lung cancer in nonsmokers and the second leading
287. cause overall. The seller of any interest in residential real property is required to provide the buyer with any
288. information on radon test results of the dwelling.

289. RADON IN REAL ESTATE: By signing this Statement, Buyer hereby acknowledges receipt of the Minnesota
290. Department of Health's publication entitled *Radon in Real Estate Transactions*, which is attached hereto and
291. can be found at www.health.state.mn.us/communities/environment/air/radon/radonre.html.

292. A seller who fails to disclose the information required under MN Statute 144.496, and is aware of material facts
293. pertaining to radon concentrations in the Property, is liable to the Buyer. A buyer who is injured by a violation of MN
294. Statute 144.496 may bring a civil action and recover damages and receive other equitable relief as determined by
295. the court. Any such action must be commenced within two years after the date on which the buyer closed the
296. purchase or transfer of the real Property.

297. SELLER'S REPRESENTATIONS: The following are representations made by Seller to the extent of Seller's actual
298. knowledge.

299. (a) Radon test(s) ☐ HAVE ☒ HAVE NOT occurred on the Property.
----- (Check one.) -----
300. (b) Describe any known radon concentrations, mitigation, or remediation. **NOTE:** Seller shall attach the most
301. current records and reports pertaining to radon concentration within the dwelling:

319. **Other Defects/Material Facts:** Are there any other material facts that could adversely and significantly affect an
320. ordinary buyer's use or enjoyment of the Property or any intended use of the Property? ☐ Yes ☒ No

321. If "Yes," explain:

322.

323. **O. WATER INTRUSION AND MOLD GROWTH:** Studies have shown that various forms of water intrusion affect
324. many homes. Water intrusion may occur from exterior moisture entering the home and/or interior moisture
325. leaving the home.

326. Examples of exterior moisture sources may be:

- 327. • improper flashing around windows and doors,
- 328. • improper grading,
- 329. • flooding,
- 330. • roof leaks.

331. Examples of interior moisture sources may be:

- 332. • plumbing leaks,
- 333. • condensation (caused by indoor humidity that is too high or surfaces that are too cold),
- 334. • overflow from tubs, sinks, or toilets,
- 335. • firewood stored indoors,
- 336. • humidifier use,
- 337. • inadequate venting of kitchen and bath humidity,
- 338. • improper venting of clothes dryer exhaust outdoors (including electrical dryers),
- 339. • line-drying laundry indoors,
- 340. • houseplants—watering them can generate large amounts of moisture.

341. In addition to the possible structural damage water intrusion may do to the Property, water intrusion may also result
342. in the growth of mold, mildew, and other fungi. Mold growth may also cause structural damage to the Property.
343. Therefore, it is very important to detect and remediate water intrusion problems.

344. Fungi are present everywhere in our environment, both indoors and outdoors. Many molds are beneficial to
345. humans. However, molds have the ability to produce mycotoxins that may have a potential to cause serious
346. health problems, particularly in some immunocompromised individuals and people who have asthma or allergies
347. to mold.

348. To complicate matters, mold growth is often difficult to detect, as it frequently grows within the wall structure. If you
349. have a concern about water intrusion or the resulting mold/mildew/fungi growth, you may want to consider having the
350. Property inspected for moisture problems before entering into a purchase agreement or as a condition of your
351. purchase agreement. Such an analysis is particularly advisable if you observe staining or musty odors on the
352. Property.

353. **P. NOTICE REGARDING PREDATORY OFFENDER INFORMATION:** Information regarding the predatory
354. offender registry and persons registered with the predatory offender registry under MN Statue 243.166
355. may be obtained by contacting the local law enforcement offices in the community where the property
356. is located or the Minnesota Department of Corrections at (651) 361-7200, or from the Department of

363. **R. MN STATUTES 513.52 THROUGH 513.60: SELLER'S MATERIAL FACT DISCLOSURE:**

364. **Exceptions:** The seller disclosure requirements of MN Statutes 513.52 through 513.60 **DO NOT** apply to

- 365. (1) real property that is not residential real property;
- 366. (2) a gratuitous transfer;
- 367. (3) a transfer pursuant to a court order;
- 368. (4) a transfer to a government or governmental agency;
- 369. (5) a transfer by foreclosure or deed in lieu of foreclosure;
- 370. (6) a transfer to heirs or devisees of a decedent;
- 371. (7) a transfer from a co-tenant to one or more other co-tenants;
- 372. (8) a transfer made to a spouse, parent, grandparent, child, or grandchild of Seller;
- 373. (9) a transfer between spouses resulting from a decree of marriage dissolution or from a property agreement incidental to that decree;
- 374. (10) a transfer of newly constructed residential property that has not been inhabited;
- 375. (11) an option to purchase a unit in a common interest community, until exercised;
- 376. (12) a transfer to a person who controls or is controlled by the grantor as those terms are defined with respect to a declarant under section 515B.1-103, clause (2);
- 377. (13) a transfer to a tenant who is in possession of the residential real property; or
- 378. (14) a transfer of special declarant rights under section 515B.3-104.

381. **MN STATUTES 144.496: RADON AWARENESS ACT**

382. The seller disclosure requirements of MN Statute 144.496 DO NOT apply to (1)-(9) and (11)-(14) above. Sellers
383. of newly constructed residential property must comply with the disclosure requirements of MN Statute 144.496.

384. **Waiver:** The written disclosure required under sections 513.52 to 513.60 may be waived if Seller and the
385. prospective Buyer agree in writing. Waiver of the disclosure required under sections 513.52 to 513.60 does not
386. waive, limit, or abridge any obligation for seller disclosure created by any other law.

387. **No Duty to Disclose:**

388. (A) There is no duty to disclose the fact that the Property

- 389. (1) is or was occupied by an owner or occupant who is or was suspected to be infected with Human
390. Immunodeficiency Virus or diagnosed with Acquired Immunodeficiency Syndrome;
- 391. (2) was the site of a suicide, accidental death, natural death, or perceived paranormal activity; or
- 392. (3) is located in a neighborhood containing any adult family home, community-based residential facility, or
393. nursing home.

394. (B) **Predatory Offenders.** There is no duty to disclose information regarding an offender who is required to
395. register under MN Statute 243.166 or about whom notification is made under that section, if Seller, in a timely
396. manner, provides a written notice that information about the predatory offender registry and persons
397. registered with the registry may be obtained by contacting the local law enforcement agency where the
398. property is located or the Department of Corrections.

399. (C) The provisions in paragraphs (A) and (B) do not create a duty to disclose any facts described in paragraphs
400. (A) and (B) for property that is not residential property.

401. (D) **Inspections.**

- 402. (1) Except as provided in paragraph (2), Seller is not required to disclose information relating to the real
403. Property if a written report that discloses the information has been prepared by a qualified third party
404. and provided to the prospective buyer. For purposes of this paragraph, "qualified third party" means a
405. federal, state, or local governmental agency, or any person whom Seller or prospective buyer reasonably
406. believes has the expertise necessary to meet the industry standards of practice for the type of inspection
407. or investigation that has been conducted by the third party in order to prepare the written report.
- 408. (2) Seller shall disclose to the prospective buyer material facts known by Seller that contradict any

Radon in Real Estate Transactions

All Minnesota homes can have dangerous levels of radon gas. Radon is a colorless, odorless and tasteless **radioactive gas** that can seep into homes from the soil. When inhaled, it can damage the lungs. Long-term exposure to radon can lead to **lung cancer**. About 21,000 lung cancer deaths each year in the United States are caused by radon.

The only way to know how much radon gas has entered the home is to conduct a radon test. MDH estimates 2 in 5 homes exceed the 4.0 pCi/L action level. Whether a home is old or new, **any home can have high levels of radon**.

The purpose of this publication is to educate and inform potential home buyers of the risks of radon exposure, and how to test for and reduce radon as part of real estate transactions.

Disclosure Requirements

Effective January 1, 2014, the Minnesota Radon Awareness Act requires specific disclosure and education be provided to potential home buyers during residential real estate transactions in Minnesota. **Before signing a purchase agreement to sell or transfer residential real property**, the seller shall provide this publication and shall disclose in writing to the buyer:

1. whether a radon test or tests have occurred on the property;
2. the most current records and reports pertaining to radon concentrations within the dwelling;
3. a description of any radon levels, mitigation, or remediation;
4. information on the radon mitigation system, if a system was installed; and
5. a radon warning statement.

Radon Facts

How dangerous is radon? Radon is the number one cause of lung cancer in non-smokers, and the second leading cause overall. Your risk for lung cancer increases with higher levels of radon, prolonged exposure, and whether or not you are a current smoker or former smoker.

Where is your greatest exposure to radon? For most Minnesotans, your greatest exposure is at home where radon can concentrate indoors.

What is the recommended action based on my results? If the average radon in the home is at or above 4.0 pCi/L, the home's radon level should be reduced. Also, consider mitigating if radon levels are between 2.0 pCi/L and 3.9 pCi/L. Any amount of radon, even below the recommended action level, carries some risk.

Radon Testing

Any test lasting less than three months requires **closed-house conditions**. Keep all windows and doors closed, except for normal entry and exit.

Before testing: Begin closed-house conditions at least 12 hours before the start of the radon test.

During testing: Maintain closed-house conditions during the entire duration of the short-term test. Operate home heating or cooling systems normally during the test. Test for at least 48 hours.

Where should the test be conducted? Any radon test conducted for a real estate transaction needs to be placed in the lowest livable area of the home suitable for occupancy. This is typically in the basement, whether finished or unfinished.

Place the test kit:

- twenty inches to six feet above the floor
- at least three feet from exterior walls
- four inches away from other objects
- in a location where it won't be disturbed
- not in enclosed areas or areas of high heat or humidity

Radon Mitigation

When elevated levels of radon are found, they can be easily reduced by a certified radon mitigation professional.

Radon mitigation is the process used to reduce radon concentrations in buildings. This is done by drawing soil gas from under the house and venting it above the roof. A quality mitigation system should reduce levels to below 4.0 pCi/L, if not lower.

After a radon mitigation system is installed perform an independent short-term test to ensure the reduction system is effective. Operate the radon system during the entire test. This test will confirm low levels in the home. Be sure to retest the house every two years to confirm continued radon reduction.

Radon Warning Statement

"The Minnesota Department of Health strongly recommends that ALL homebuyers have an indoor radon test performed prior to purchase or taking occupancy, and recommends having the radon levels mitigated if elevated radon concentrations are found. Elevated radon concentrations can easily be reduced by a qualified, certified, or licensed, if applicable, radon mitigator."

Every buyer of any interest in residential real property is notified that the property may present exposure to dangerous levels of indoor radon gas that may place the occupants at risk of developing radon-induced lung cancer. Radon, a Class A human carcinogen, is the leading cause of lung cancer in nonsmokers and the second leading cause overall. The seller of any interest in residential real property is required to provide the buyer with any information on radon test results of the dwelling".

How are radon tests conducted in real estate transactions? There are special protocols for radon testing. The two most common ways to test are either using a calibrated continuous radon monitor (CRM) or two-short term test kits used at the same time. The short-term test kits are placed 4 inches apart and the results are averaged.

Continuous Radon Monitor (CRM)

Fastest

Simultaneous Short-term Testing

Second Fastest

All radon tests should be conducted by a certified professional. This ensures the test was conducted properly, in the correct location, and under appropriate building conditions. A list of these radon measurement professionals can be found at MDH's Radon website. If the seller previously conducted testing in a property at or above 4 pCi/L, the home should be mitigated.

5. Minnesota Statute 103I.235 requires that, before signing an agreement to sell or transfer real property, Seller must disclose information in writing to Buyer about the status and location of all known wells on the property. This requirement is satisfied by delivering to Buyer either a statement by Seller that Seller does not know of any wells on the property, or a disclosure statement indicating the legal description and county, and a map showing the location of each well. In the disclosure statement Seller must indicate, for each well, whether the well is in use, not in use or sealed.

10. Unless Buyer and Seller agree to the contrary in writing, before the closing of the sale, a Seller who fails to disclose the existence or known status of a well at the time of sale, and knew or had reason to know of the existence or known status of the well, is liable to Buyer for costs relating to sealing of the well and reasonable attorneys' fees for collection of costs from Seller, if the action is commenced within six years after the date Buyer closed the purchase of the real property where the well is located.

15. Legal requirements exist relating to various aspects of location and status of wells. Buyer is advised to contact the local unit(s) of government, state agency, or qualified professional which regulates wells for further information about these issues. For additional information on wells, please visit the Minnesota Department of Health's website at www.health.state.mn.us.

92. **WELL TYPE:** Use one of the following terms to describe the well type.

93. **WATER WELL:** A water well is any type of well used to extract groundwater for private or public use. Examples
94. of water wells are: domestic wells, drive-point wells, dug wells, remedial wells, and municipal wells.

95. **IRRIGATION WELL:** An irrigation well is a well used to irrigate agricultural lands. These are typically
96. large-diameter wells connected to a large pressure distribution system.

97. **MONITORING WELL:** A monitoring well is a well used to monitor groundwater contamination. The well is
98. typically used to access groundwater for the extraction of samples.

99. **DEWATERING WELL:** A dewatering well is a well used to lower groundwater levels to allow for construction
100. or use of underground spaces.

101. **INDUSTRIAL/COMMERCIAL WELL:** An industrial/commercial well is a nonpotable well used to extract
102. groundwater for any nonpotable use, including groundwater thermal exchange wells (heat pumps and heat
103. loops).

104. **WELL USE STATUS:** Indicate the use status of each well. CHECK ONLY ONE (1) BOX PER WELL.

105. **IN USE:** A well is "in use" if the well is operated on a daily, regular, or seasonal basis. A well in use includes
106. a well that operates for the purpose of irrigation, fire protection, or emergency pumping.

107. **NOT IN USE:** A well is "not in use" if the well does not meet the definition of "in use" above and has not been
108. sealed by a licensed well contractor.

109. **SEALED:** A well is "sealed" if a licensed contractor has completely filled a well by pumping grout material
110. throughout the entire bore hole after removal of any obstructions from the well. A well is "capped" if it has
111. a metal or plastic cap or cover which is threaded, bolted or welded into the top of the well to prevent entry
112. into the well. A "capped" well is not a "sealed" well.

113. If the well has been sealed by someone other than a licensed well contractor or a licensed well sealing
114. contractor, check the well status as "not in use."
